

Fantastic Four

Vanco Nominated for Four Awards at World Communications Awards 2007

Vanco, the pioneering global Virtual Network Operator (VNO), has been shortlisted as a finalist in all four awards that it entered in the World Communications Awards (WCAs) 2007.

The categories it has been nominated in are:

- Best Global Operator
- Best Project
- Best Managed Service, which Vanco previously won in 2005
- Best Customer Care, which Vanco previously won in 2006

In many of the categories, Vanco has been positioned with BT, Verizon Business, Orange Business Services and AT&T, reflecting the emergence of a 'Big Five' group of network service providers capable of delivering solutions to global enterprises. This separation between global and regional players has been recognised by a number of industry analyst organisations.

These nominations add to the praise that Vanco is receiving all over the world, most recently winning awards in Singapore and Australia, and shortlisted in New Zealand.

Results for the WCAs will be announced in November.
