FOR IMMEDIATE RELEASE

RELIANCE GLOBALCOM TO EXPAND GLOBAL NETWORK CONNECTIVITY INFRASTRUCTURE TO EQUINIX TOKYO

Global network options seamlessly extended for global Enterprise

Tokyo, Japan – June 17, 2010 – Reliance Globalcom, the leading global provider of managed network and communication services for multinational enterprises and carriers, and Equinix, Inc. (Nasdaq: EQIX), a provider of global data center services, today announced that Reliance Globalcom will extend its existing points-of-presence in Japan to include Equinix's Toyko-2 (TY2) International Business Exchange™ (IBX®) data center. The expansion will enable Reliance Globalcom to improve the cost efficiency and capacity of IPv6-enabled global connectivity services to the 230 countries covered by its network footprint. It will also enable all of Equinix's Tokyo customers to directly access Reliance Globalcom's advanced VPLS network.

Reliance Globalcom currently leverages Equinix IBX data centers in 11 cities worldwide, namely Chicago, Dallas, Ashburn, Los Angeles, New York, Silicon Valley, Paris, Frankfurt, London, Singapore and Sydney, to achieve optimized performance for its connectivity services throughout the globe. The globally recognized reliability and availability of the Equinix IBX data centers will supplement the reach of Reliance Globalcom's global infrastructure. Equinix customers out of Japan can now connect directly to Reliance Globalcom's network with no requirement for third party connections – enabling more secure and efficient global connectivity.

“We recognize that Equinix already hosts a significant community of financial participants around the world, as well as an increasing number of enterprise and cloud service providers in their data centers, and close synergies exist with these sectors and our global business,” added Owen Best, President Reliance Globalcom Asia. “In addition, by extending the diversity of connectivity access to our global network we provide our customers with the security of service and expanded geographic reach that those businesses increasingly demand.”

“Our relationship with Reliance Globalcom, a globally recognized provider in the managed service provision arena, further demonstrates our leadership role in operating state-of-the-art data center infrastructure with operational excellence,” said Kei Furuta, managing director of Equinix in Japan. “Our existing community of

international and local networks and carriers can also benefit from more efficient connectivity to Reliance Globalcom's next generation global network at both of our TY1 and TY2 IBX centers."

About Reliance Globalcom

Reliance Globalcom, a division of Reliance Communications, spearheads the Global Telecom operations of India's largest Integrated Telecom Service Provider. Reliance Globalcom brings together the synergies of Reliance Communications' Global Business encompassing Enterprise Services, Capacity Sales, Managed Services and a highly successful bouquet of Retail products and services comprising of Global Voice, Internet Solutions and Value Added Services. The company serves over 2,100 enterprises, 200 carriers and 2.5 million retail customers in 163 countries across 6 continents.

Reliance Globalcom owns the world's largest private undersea cable system spanning 65,000 Kilometers seamlessly integrated with Reliance Communications' domestic optic fiber running over 190,000 Kilometers, providing a robust Global Service Delivery Platform connecting 40 key business markets in India, USA, Europe, the Middle East, and the Asia Pacific region. With its recent acquisition of eWave World (now Reliance WiMAX World), a pioneer in the global WiMAX space, Reliance Globalcom has the capability to launch 4G services in over 50 countries. It has also acquired the Vanco Group (now Reliance Vanco Group), enabling the company to provide managed services to over 230 countries and territories across the globe.
